

Business Developer - Manager

Welcome to be critical analytical, questioning everything.

Brief Description of what we do and what we are looking for:

Note: "Teach and Learn in a fast pace environment that only startups at the right time and place can offer."

We are a young academic Start-up focusing on Brain Inspired Computational Architectures. At Hoursec, we work together with leaders, researchers and innovators who want to change technology, make it better and create efficient solutions for our customers. We are committed to build the best energy aware Software/Hardware solution, we are pushing technology boundaries with interdisciplinary cutting edge approaches. Do you have a passion for managing scientific projects, technological products and the financials to make them happen? Are you open minded, creative and innovative? Hoursec is your home.

Responsibilities

- Identify and maintain deep technological partnerships.
- Ensure optimal operations and communications to achieve Hoursec's objectives.
- Planning, Strategy and management to assure project success.
- Management, sales & marketing with leadership for head of engineering tasks.
