Computer Scientist - Electrical Engineer
Welcome to our team of Unified Theories Builders.

Brief Description of what we do and what we are looking for:

"You like Cadence so much that it would be your best second option, after Hoursec."

We are a young academic Start-up focusing on Brain Inspired Computational Architectures. Our Research & Development is based on optimisation on parallel computation with highly non-linear stochastic units. We are currently committed to deploy our cutting edge technology to build our first commercial application. For this challenge and opportunity we are looking for passionate and visionary Computer Scientist to complete our team of Physicists.

Responsibilities

- Excellent abilities in OpenCL.

- Library design.

- Software and Hardware co-development.

- Performance verification and power-aware verification.

- Problem solving in design, micro-architects and firmware.
